Response to Arguments

Applicants arguments Applicant's arguments filed on 10/11/2005 have been fully considered but they are not persuasive.

Examiner respectfully disagrees with Applicant's assertion on Page 5, fourth paragraph of the remarks "According to Gopikanth, the mobile station initially determines if it can use its home PLMN, and **if this home PLMN is available**, the mobile station will attempt to contact its home PLMN. If the home PLMN is unavailable, then the mobile station will compile other available networks based on strength of the signals from these networks (see Gopikanth, column 7, lines 24-33). In other words, Gopikanth discloses a method of selecting a home PLMN if any home PLMN has been detected regardless of the strength of the home PLMN, and selects from other networks (PLMN) if no home PLMN has been detected, which provides the same method as PA and has the same problems as PA. Accordingly, no combination of PA and Gopikanth teach or disclose "determining if the RPLMN is detected" and if it is "determining if a signal strength transmitted from the RPLMN is higher than a particular level." Applicant therefore requests withdrawal of this rejection".

The phrase "home PLMN is available" means that the pilot signal from at least one base station from the home PLMN exceeds a predetermined threshold level in signal strength and therefore the home PLMN is included in the active set (Gopikanth, Col. 1, lines 50-53; Col. 7, lines 3-5; Blakeney, Col. 3, lines 45-60). Therefore, the list contains only those PLMNs that offer sufficient signal strength (that exceeds the

Art Unit: 2683

threshold signal strength value). Also the PLMNs are listed in order based on the received signal strength (Col. 7; line 35).

Also, Gopikanth does not require using the home PLMN as per Figure 4, step #402 since the specification says it can use other PLMNs (Col. 7, lines 29-30).

The Applicant disclosure is a special case of Gopikanth's where it considered signal strength as a lone criterion for the selection of PLMNs and not available services as Gopikanth did.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
